BETTENDORF SWING MOTION CABOOSE TRUCKS

This swing motion truck was manufactured by the Bettendorf Co. from 1924 to the early 1930s. Railroads that had some cabooses with this truck included ATSF, BN, CB&Q, C&O, Erie, EL, MILW, MKT, MP, NKP, N&W, Pere Marquette and Rock Island. These trucks could be seen under wood double sheathed, single sheathed, all steel, transfer, drovers and even extended vision cabooses.

Our trucks feature one-piece black acetal plastic moldings with separate brake shoe detail, and non-magnetic, insulated metal RP-25 contour wheelsets.

Trucks are also available with "semi-scale" (.088" wide) wheels.
